PROFILE

Focused on fraud and scam analysis, with a background in psychology and two Google data analytics certifications. Three fraud analysis applications built and deployed, covering multilingual social engineering detection, transaction scoring and threat intelligence. Published analyses of real scam cases through Mind & Malice.

Languages — French: native · Portuguese: bilingual, taught professionally · English: strong written, intermediate spoken

SKILLS

Fraud & investigation — Typologies: CEO fraud / BEC, supplier IBAN change, bank advisor impersonation, vishing, spoofing · Manipulation techniques: manufactured urgency, secrecy requests, authority impersonation · Case analysis · OSINT · Threat feeds and indicators of compromise

Data & machine learning — Python (pandas, scikit-learn) · SQL · Random Forest, logistic regression, Isolation Forest · Heavily imbalanced datasets · Exploratory data analysis

Tools — Streamlit · Plotly · Git / GitHub

PROJECTS

SEPA Social Engineering Detector · [axelle-sepa-detector.streamlit.app](#)

Detects payment fraud risk in financial emails across French, English and Portuguese. Hybrid approach: a Random Forest combined with a behavioural analysis engine that identifies manipulation techniques and returns a broken-down score, the attack type and a recommended action.

AI Fraud Detection System · [axelle-fraud-detection.streamlit.app](#)

Detection across 283,726 banking transactions, 0.17% of them fraudulent. Compares two approaches — supervised logistic regression and Isolation Forest — with an explainable scoring layer showing each factor's contribution to the alert.

Threat Intelligence Dashboard · [axelle-threat-intelligence.streamlit.app](#)

Aggregates two public indicator-of-compromise feeds (abuse.ch, Emerging Threats), automatically refreshed and enriched with geolocation, ASN and hosting organisation. Several hundred indicators across around fifty countries, with IP lookup.

Mind & Malice · [mindandmalice.substack.com](#)

Fraud analysis platform: published real scam cases across the field. Documented case files on GitHub.

PROFESSIONAL EXPERIENCE

Career transition into fraud & financial crime — personal projects · 07/2025 – present

Built and deployed three fraud analysis applications, published case analyses, preparing for CompTIA Security+.

Portuguese Language Teacher — Self-employed · 2017 – present

Designed learning paths with individual follow-up.

Order Picker — Delhaize, Zellik (Adecco assignments) · 11/2025 – 02/2026 · 05/2026 – 08/2026

Strict operating procedures and compliance checks under throughput constraints. Recalled by the agency for a second assignment at the same site.

In-home Childcare — private family, Belgium · 10/2018 – 06/2024

Nearly six years in a position of trust with the same employer, fully autonomous.

Call Agent — Ipsos, Ghent · 07/2022 – 04/2024

High-volume standardised telephone interviews; collected and qualified information from unknown respondents, with accuracy and neutrality requirements.

Public Information Agent — N-Allo, Covid-19 helpline · 11/2020 – 01/2021

National information line: handled calls from an anxious public, directed callers, booked vaccination appointments, applied official messaging strictly.

In-home Childcare — private family, Belgium · 02/2018 – 09/2018

EDUCATION & CERTIFICATIONS

CompTIA Security+ (SY0-701) · CompTIA — in preparation

Google Advanced Data Analytics Certificate · Google, 2024

Google Data Analytics Certificate · Google, 2024

Bachelor programme, Data & AI · STUDI, 2024–2025 — first year attended

Psychology studies · Haute École de la Province de Liège, then Instituto Superior Miguel Torga, Coimbra, Portugal — 2009–2014, four years completed
